

Micro SD Card Project

2017 Report

Pradeep Jah
Nepal Project Director

2016 saw the first stages of the Micro SD Card Project take place. The content translation and narration for the cards was ***completed and initial funding was sent*** to Pradeep Jha in Nepal. Cards were loaded individually at first. Pradeep was able to borrow a multi-card loader and then assemble a group of trainees to teach them how to best distribute the cards.

2017 will be a challenging year as we ***send additional funding*** and see more SD cards loaded, distributed and used by house church trainees to spread the Gospel. **Pradeep Jha is coming to the U.S. this year** and will be speaking in several churches as we implement plans and continue to raise funds to provide a total of 10,000 SD cards.
